All About...

THE INSTITUTE

The Construction Specifications Institute
110 South Union Street, Suite 100
Alexandria, VA 22314
www.csinet.org

Founded in 1948, the Construction Specifications Institute is a not-for-profit technical organization dedicated to the advancement of construction technology through communication, research, education and service. CSI serves the interests of architects, engineers, specifiers, contractors, product manufacturers and others in the construction industry.

THE MAGAZINE

The Memphis PerSPECTive is published ten times a year by the Memphis Chapter of the Construction Specifications Institute. Appearance of products or services, name or editorial copy does not constitute an endorsement by the Memphis Chapter of CSI nor any of its members.

Circulation of *The Memphis PerSPECTive* includes over 275 people consisting of members of the Memphis Chapter of CSI, members of the Memphis AIA Chapter, CSI Regional editors, the CSI Institute and other interested persons nationwide. To be included on future mailings, forward your name and address and a check for \$25.00 to the following address:

The Memphis PerSPECTive
P.O. Box 172349
Memphis, TN 38187-2349

You may also access a complimentary copy of *The Memphis PerSPECTive* online at www.csimemphis.org.

MEMBERSHIP

Architects, engineers, contractors, and manufacturers—14,000 members strong—are in touch with one another through their Construction Specifications Institute membership. CSI provides contacts in the construction industry as well as provides you up-to-date information to help you do your job efficiently and effectively. Yearly Institute membership fee for Professional, Industry, or Associate is \$240 plus \$40 Memphis Chapter fee = \$280; Institute membership fee for Intermediate is \$115 plus \$40 Memphis Chapter fee = \$155.00; and Institute membership fee for students is \$27 plus \$10 Memphis Chapter = \$37.

Membership Info. - Nikole Daniels (901) 261-1505
Email: ndaniels@selftucker.com

For contact information on any Board Member or Committee Chair, see inside the back cover for a complete listing including phone and fax numbers as well as available email addresses.

SUBMITTING ARTICLES

Readers are encouraged to submit articles of interest within the construction industry for publishing. Articles on individual projects whether currently in design, under construction, or recently completed are encouraged.

Any article and its related images must be submitted **before the 20th of the month preceding publication** in order to meet production deadlines. Any printed articles, photos or program inserts should be forwarded to:

The Memphis PerSPECTive

Attn: Duke Walker
612 North 5th Street
Memphis, TN 38107
or
dukeonbass@att.net

Articles and images should be submitted in electronic format via digital media or email.

Microsoft Word documents are strongly preferred for articles, minus tabs and any other formatting. All images must include a date and caption. If printed photographs are submitted, please include SASE

Email: jsweeney@trojungbrannen.com

Tabletop Displays at Monthly Meetings

At each monthly meeting, the Chapter encourages Industry Members to provide a table display of their product and/or services for inspection and education of those attending the meeting. After the meal and prior to the program, the displayer will be given five minutes to address the group. The table display is also encouraged to be represented during the social hour and after the program for any questions by the attendees.

The presentation fee for this time is \$25.00.

PRESIDENT'S MESSAGE

*Charles F. Cooper, CSI, CCCA
President-The CSI Memphis Chapter*

One leads into another. It just does not stop. Just when one President's message is complete another one is due. Where does the time go? May is gone. The Barbeque has been prepared and consumed at the Memphis in May contest. I am sure those near the fair grounds could smell the aroma. We all watched with fascination as the old, muddy and boiling Mississippi rose to catastrophic levels and many were flooded out. Yes, May was everything and more. But your CSI chapter is moving on with business as usual.

We have a new budget for our new fiscal year starting July 1, 2011. The membership voted on a new slate of officers for the upcoming year. We held our golf tournament and the annual awards banquet in June. In July we will hold a transfer of power meeting to serve as a transition from one administration to another.

Enjoy the summer. Take those family vacations and relax. CSI will be back and the agenda starts August 18th with the first CSI Memphis Chapter Dinner Meeting of our new fiscal year. But, please remember that if you renewal is up for CSI renew before you take vacation. Keep your membership current-renew today.

Now, take the time and reserve (call Charlotte at 377-8063 or email (charlotte.c@comcast.net)) for the August 18th Chapter Dinner Program. Now, take the time to pencil in on your calendar the August 12-13th Gulf States Region Training in Nashville, TN. Now, take the time to pencil in on your calendar the September 13-16th CSI National Convention in Chicago. All new leaders, committee chairs, co-chairs and all others interested in becoming leaders should plan on attending the GSR Training event in Nashville.

Who are we? We are CSI Memphis Chapter!

*Charles F Cooper, CSI, CCCA
President*

ATTENTION: Please take advantage of our new online registration capability by visiting www.csimemphis.org to register for monthly membership meetings and programs.

STUDENT AFFILIATE NEWS: U of M

Thomas Elliott 2011-2012 CSI-Memphis Student Affiliate Chapter President-

I am currently a fourth year architecture student the university. I am proud to be a newly voted office member of our CSI student chapter and I am looking forward to what this next year holds.

Hello CSI-Memphis, I hope everyone's summer is off to a restful start! I know for me work never seems to stop and life always has new surprises awaiting every turn. The students have all gone their separate ways for the summer vacation but all the CSI-S members are excited about upcoming CSI events: the golf tournament, the Gulf States Region caucus is in the early part of August, and the National CSI convention in September. The students here at the U of M plan to show our support and help in any way possible. We have been organizing and brainstorming on ways to make this the most memorable year ever for CSI-S. I look forward to working with the parent chapter in the months to come and can't wait for the next semester to start. As always, we appreciate all of the work and support you give to the student chapter, thank you very much!

MAY CHAPTER MEETING REPORT

Our program was on Integrated Project Delivery using completed projects as examples. Mr. James Langford and Mr. Wayne Smith did an excellent job in presenting the IPD method as used by the SouthBuild team. This team is made up of the Architect (SpiritArchitecture), contractor (Smith-Doyle Contractors, Inc.), contractor (Hensley Construction Services). This team, with the owner collaborate to achieve the team goals of a completed project. This team approach by SouthBuild has successfully constructed numerous jails over the past fourteen years-all on time and under budget. All cost savings have been returned to the owner.

IPD is a hot topic at this time, as stated by Edith Washington at the program presentation. She was surprised that SouthBuild has quietly been using this method so successfully for the past fourteen years. Mr. James Langford stated that this same approach could be used with other types of projects just as successfully as long as all the elements were in place. Trust is a key element. Proven success tends to create trust.

We give our thanks for James and Wayne for sharing this IPD approach with us and taking the time to speak to us.

*Charles F. Cooper, CSI, CCCA
CSI Memphis Chapter President*

GSR CSI 2011 AWARDS BANQUET

Mobile, AL

April 30, 2011

Once again, the CSI-Memphis Chapter walks away with more awards than any other Chapter in the Region. Leading off was:

Charles Cooper, CSI, CCCA **"Certificate of Appreciation to Charles F. Cooper, CSI, CCCA"** "For rendering distinguished service from July, 2010 to June, 2011 as the Chapter representative to the Gulf States Board of Directors and for your contributions in advancing the objectives of The Construction Specifications Institute, this certificate of Appreciation is presented to you on the 30th day of April, 2011

Nikole Daniels, CSI, CCCA, Membership Chair of the Memphis Chapter. The award states: "For her exemplary service as the Membership Committee Chairperson of the CSI Memphis Chapter during her tenure for the FY 2010-2011, the Gulf States Region of THE Construction Specifications Institute awards its **"Membership Commendation"** to Nikole H. Daniels, CSI, CCCA."

Hans Faulhaber, CSI, CDT, has, during the past year, submitted and had published several technical articles centering on construction management. Hans' award reads as follows:

"For his outstanding presentation of articles and verbal presentations in the field of Construction Management and Construction Documents during FY 2010-2011, the Gulf

States Region of The Construction Specifications Institute awards its **"Technical Commendation"** to Hans D. Faulhaber, CSI, CDT."

Thomas W. "Tommy" Smith, RA, CSI, CCS has over the past several years, edited and presented for publication several articles for the "PerSPECTive" involving SpecQuest subjects.

Tommy's award reads as follows: "For his technical articles delving into problems encountered by specification writers and for the resolution of these problems, the

Gulf States Region of The Construction Specifications Institute awards its **"Technical Commendation"** to Thomas W. Smith, RA, CSI, CCS.

Dirk Veteto—For Dirk's help on the Membership Committee of the Gulf States Region, his award reads as follows:

"Certificate of Appreciation to Dirk L. Veteto, CSI"

"For your part in the Membership "Fishing" seminar presented during the 2011 leadership meeting held in Huntsville, Alabama. This unique approach to presenting such a vital topic has to be classified as one of the most informative and entertaining membership seminars seen by this or any other Region. Because of innovative method used and over all success of energizing your audience, this certificate of appreciation is presented to you on this 30th day of August, 2011."

During Duke's editorship of *The Memphis PerSPECTive*, the magazine of the CSI-Memphis Chapter, it has received many awards, including two awards at the 2011 GSR conference in Mobile, Alabama. The two awards read as follows:

Region Continuing Publication Award:

"This award is presented to by the Gulf States Region of The Construction Specifications Institute for the Region Continuing Publication Award to "The Memphis PerSPECTive."

Region Publication Award – Most Improved Publication:

>:This award is presented to "The Memphis PerSPECTive" by the Gulf States Region of The Construction Specifications Institute for the Most Improved Publication in the following areas of appearance, self sustainability and service to the Memphis Chapter, The Gulf States Region and the Institute".

OUR HATS ARE OFF TO THESE CSI-MEMPHIS MEMBERS FOR THEIR OUTSTANDING WORK FOR OUR CHAPTER, THE REGION AND THE INSTITUTE.. BE SURE TO ATTEND THE CSI-MEMPHIS CHAPTER'S HONORS AND AWARDS BANQUET, JUNE 17, 2011, AT HOLIDAY INN SELECT, 5795 POPULAR AVE., STARTING AT 5:30PM.

Ron Roberts, CSI

TOM MASON ANNOUNCES HIS RETIREMENT

A child of post-war blue collar parents, he was raised on a dairy farm (his dad's hobby) that got out of hand and grew to nearly 100 head. Since his father maintained his factory position the farm became a busy place for his siblings. As the 5th of 6 children he was blessed with an older brother that had an unbelievable ability to understand, evaluate, and repair the second hand equipment necessary to operate the farm. Common for the day, he attended all 13 years of public education at the same rural school. Although his high school performance was academically unremarkable (too much farm work was the weak excuse), socially he encountered a young lady at a skating rink on a cold February night that subsequently became "significant."

During that time period, two other events were of note. A tornado 5 weeks before high school graduation damaged the farm beyond repair. Several cattle survived but the buildings didn't. Being in a building during its collapse instilled in him a new appreciation for structures, nature, and the uncertainty of life itself. The other event was entering a Division 1A university (hockey) in the northern-most reaches of the upper peninsula of Michigan—"Michigan Tech." At the time, enrollment was 5000 students—nearly all engineering, and nearly all men. At that time, those not in college were classified 1-A and immediately drafted to serve in Viet Nam.

After two years of college came marriage. After three came his older son. Upon graduation in Civil Engineering, a structural engineering job was taken in down-river Detroit while his wife continued her Bachelor's degree where she began 4 years earlier. A few months after her graduation a second son was born. A few months after that Mr. Mason started graduate school at Western Michigan University pursuing a Masters degree.

His first professorial experience was at Ohio University where he completed a contract for a faculty member who was on medical leave. While there, he responded to many advertisements for university teaching positions posted in college faculty publications. One of these positions was from the Herff College of Engineering at Memphis State University. Soon after becoming a faculty member, Mr. Mason attended several local CSI meetings as a guest of Dr. Stephen Langa the

coordinator of the construction program at that time. He did not become a CSI member then because he was assigned by the department to be the advisor of the construction student organization (AGC) and was encouraged to become involved with the state professional surveying organization (TAPS). Conflicting meeting times between these three groups restricted his involvement in CSI for many years.

Preceding the formation of the Architecture Department at the university, Mr. Mason took on the duties of a retiring professor of structures. At the same time he learned that Technology's construction program was being phased out. These changes initiated his opportunities to become part of the architecture program before it transferred away from the College of Engineering. When the program began the move toward its own department, he was eager to become involved with CSI Memphis and become the advisor to the student chapter. The position provided many fond memories along with an occasional disappointment. As new student members joined each new academic year, his greatest challenge of advising remained—give advice, not directives—to their ideas, decisions, even when eagerness overshadowed practicality.

Along the span of 38 years at the university, Mr. Mason taught 21 separate course titles concentrating in his early years in Industrial Materials, Surveying, Construction, and Architecture courses. He was also lead professor for several support courses for manufacturing, computer, and electronics majors in the Engineering Technology Department. During the mid 80's he was contracted to teach courses in nuclear power plant materials for nuclear plant control room operators at Clinch River Nuclear Plant and Watts Bar Nuclear Plant for TVA; and the Enrico Fermi Nuclear Power Generator for Detroit Edison. He also presented one-day seminars for professional organizations in topics such as Number Theory, Hydrology, and Facilities Engineering (for the death-care industry). In his later years at the university he concentrated in teaching courses in Building Construction Methods and Materials, Engineering Mechanics, Structural Steel Design, and Structural Concrete Design. He was awarded the Department of Art Distinguished Teaching Award and well as the University Distinguished Teaching Award.

Mr. Mason decided to retire at the end of the 2011 academic year. His post-retirement plans include: complete construction of a new home in Tipton County at the request of his "significant" other. With one son—a doctor living in Ashville NC and the other—a corporate scheduler for Flintco Construction Company in Tulsa OK, granddaughter visits to both locations will require significant travel time. He will also rekindle his structural engineering and professional surveying consulting practice. To complete his bucket list, his property north of Memphis is already zoned to allow for construction of a large farm pond and a private air strip. Should he remain in good health, he plans a second trip to Alaska on the same motorcycle he used to make the first trip with his wife in 1992.

*Editor's Note—
A few years ago, Zach Smith, Sanjay Patel and I (of the Student Affiliate Chapter) figured out (using sound mathematical procedures of course) that Tom has taught well over 27,000 students, and that was back then....*

MAXIMIZING MEMBERSHIIPS

Dennis Elrod, AIA, CSI

Dennis was born in southwest Michigan to a blue collar factory worker and a seamstress who uprooted themselves from Middle Tennessee after WWII in search of jobs. His father worked at the Bendix Corporation and his mother at Simplicity Pattern. The middle child of 3, forced his mother to become a full-time mother. At the age of 9, his parents divorced, and Dennis moved to Miami, Florida with his Mother, older Brother, and younger sister, where a maternal uncle helped get them back on their feet. The family was uprooted again at the end of that 4 year stint and ended up in Murfreesboro, TN to help take care of his maternal grandmother until she passed away. Finally 4 years later, the family settled in Tullahoma on the family farm where his Mother was raised. While in High School, he played drums in a 60's garage band with his older brother and friends, learned to play piano by ear, a little guitar, was a runner, and played tennis. In those days, his nickname was "Skinny Denny".

Upon graduation from High School, Dennis knew he wanted to be either a mathematician or an architect. He attended Motlow State Community College to get Math, English and Science out of the way, worked a full-time job at a local wholesale grocery warehouse, and also part-time job at United Parcel Service. He purchased his first car, a turquoise and white 1959 Ford Galaxie Fairlane at age 15 when a church family moved out of state. He gained an interest in muscle cars shortly thereafter and has owned a 1964 Ford Falcon, two 1968 Camaros, a 1965 Chevy Nova and a Pontiac Trans Am.

A twist of fate brought Dennis to Memphis in the Fall of 1974 after having enrolled in the Architecture Program

at UT Knoxville. He fell head-over-heels in love with a young tennis player from Tullahoma whose family had to attend Memphis State University as it was a family legacy. He transferred to Memphis but the relationship soon fizzled. He decided to stay at MSU and finish his BSET degree, graduating Cum Laude in 1977. Upon graduation from MSU, Dennis re-enrolled in the Masters degree program the following year and graduated with an MSTE degree, with Honors in 1983.

After his graduation in 1977 jobs were scarce and Dennis went to work for Clark, Dietz and Associates, where he became a Civil and Structural Draftsman, gaining practical experience in surveying (thanks to Mr. Mason for the basic training), and obtained his CET certificate becoming a successful process piping designer. In 1979, upon the firm's merger with Caudill Rowlett and Scott (which closed the Memphis office), Dennis went to work for Hall & Waller and Associates where he interned for 3 ½ years. In 1982 he made a career change and joined Hnedak Bobo Gooch and Associates and the rest is history. Dennis will celebrate his 29th year at HBG this Fall.

Dennis is married to Leigh Ann Blakely, a Licensed Clinical Social Worker with Baptist Trinity Hospice, has a 15 year old son Joseph, who will be a Sophomore at White Station, and a 12 year old daughter, Elizabeth, who will be a 7th grader at Grace-St. Luke's Episcopal School. He and his family live in the Evergreen Historic District in their 2nd home which he was able to design in the midtown I-240 Redevelopment Corridor. He enjoys golf, flying, scuba diving, racquetball, tennis, volleyball, fly fishing, playing bluegrass banjo, and is starting on a 1963 Ford Falcon conversion to a street machine with his son. Dennis' latest hobby for the past 4 years is Director of Set Design and Construction for Grace-St. Luke's Theater Arts Program. The Elrods are members of Lindenwood Christian Church and volunteer for various charities, hospice and school events.

Editor's Note:
Having worked under Dennis on several projects, it can only be added that he is a fine gentleman and sage professional. He knew what he wanted, wanted what was necessary, and communicated that with the expectation of accepting nothing less. The entire community benefits from his gentility and sound wisdom.

Employment Opportunity Allen & Hoshall

Construction Specifications Series

Experienced Engineer:

95 year old engineering firm seeking experienced Electrical Engineer interested in Building Systems Design. A minimum of 3-7 years relevant experience, a P.E. license or the ability to become licensed. Candidates should have experience in the following areas: lighting, power and communication/fire alarm design for commercial and/or institutional type facilities. Typical skills should include: AutoCAD or Revit experience, load flow calculations, client interaction, ability to travel, energy audits, preparation of single-line diagrams, sustainable design, NEC/NFPA codes, etc. Candidates should be motivated to perform and interested in personal growth. Excellent salary and benefits package. Immediate opening in our Memphis and Jackson, MS office.

Graduate Engineer:

95 year old engineering firm seeking a graduate Electrical Engineer interested in Building Systems Design. A BSEE degree required/EIT preferred. Candidate should have good communication skills, interact well with clients, have the desire for personal growth and be able to travel. Candidates should be interested in the following areas: lighting, power and communication/fire alarm design for commercial and institutional type facilities. AutoCAD or Revit experience preferred. Excellent salary and benefits package. Immediate opening in our Memphis office.

Experienced Electrical Designer:

95 year old engineering firm seeking experienced Electrical Designer interested in Building Systems Design. A minimum of 3 years relevant experience desired. Candidates should have experience in the following areas: lighting, power and communication/fire alarm design for commercial type facilities. The Mid-South's Authorized Representative

- Your Questions and Answers for the Week are:

1.Division 01 Sections:

- A. Are written in a narrative style.
- B. Are written as specifications because they specify products.
- C. Specify requirements in the same sense other sections specify products.
- D. Should be bound in a separate volume of the project manual.

Answer: C

2 A key element in writing Division 01 sections is:

- A. The name of the owner and the project.
- B. The content of Divisions 02-14 - Facility Construction Subgroup.
- C. The general conditions to be used for the project.
- d. A table of contents of sections of Divisions 02-49.

Answer: C

From the CSI Construction Specifications Education Program:

IMPORTANCE OF DIVISION 01

Division 01: Coordinator among, and has multilateral relation with all elements of construction documents

Powerful document which controls construction administration organization of contract documents
Entire organization of contract documents under agreement functions as pyramidal arrangement

Most general & all governing provisions in agreement & conditions of contract

Most detailed requirements come last in spec sections, & do not govern anything preceding them

Division 01 sections expand on general administrative provisions of conditions of contract & apply broadly to common administrative & procedural requirements of all of other sections of specs. Specs and drawings further expand on Division 01 & provide detailed requirements for specific portions of work.

RELATIONSHIP OF DIVISION 01 WITH DIVISIONS 02-49

Division 01 addresses common administrative & procedural requirements of spec sections to avoid having to repeat same procedures & requirements in each section Requirements specific to specific product of section addressed in that section

Please refer to CSI's new Construction Specifications Practice Guide for the must-have specifications writing reference...and essential study aid for the Certified Construction Specifier (CCS) Exam.

Until next week...

Steve C. Tubré, CSI, CCA
